Part #30808

GM Column Turn Signal Connector

Installation Instructions

This kit is for installing the mating connector for plugging the steering column wires into the chassis turn signal wires for those columns that have been damaged or reproduced without an attaching plug.

Attach each of the eight (8) wires coming out of the column to the terminals provided by crimping or soldering and then insert the wires into the plastic housing in the order shown in the chart below.

Note: *After inserting all wires into the gray plastic housing the color codes of the column wires and the color codes of the chassis wires should match. In some instances, the color codes of the column wires are a stripe on a black wire instead of a solid color wire.*

Turn Signal Connection

<u>GM Color</u>	<u>Designation</u>	<u>Turn Signal Conn. Port</u>
Black	Horn	G
Light Blue	Left Front Turn Signal	H
Dark Blue	Right Front Turn Signal	J
Brown	Hazard Flasher	K

Painless Performance Limited Warranty and Return Policy

Chassis harnesses and fuel injection harnesses are covered under a lifetime warranty. All other products manufactured and/or sold by Painless Performance are warranted to the original purchaser to be free from defects in material and workmanship under normal use. Painless Performance will repair or replace defective products without charge during the first 12 months from the purchase date. No products will be considered for warranty without a copy of the purchase receipt showing the sellers name, address and date of purchase. You must return the product to the dealer you purchased it from to initiate warranty procedures.
